

## Beautiful Dragons Multi Vitamin with Acidophilus

This mixture is a blend of probiotics (acidophilus), amino acids, and essential vitamins and minerals. The mixture is slightly coarse, so you can't use it as a dusting powder on insects. It is designed to be sprinkled on top of fresh greens and veggies. Or included in slurries for sick and rehabilitated reptiles.

Probiotics are the good bacteria that aid in the digestion process by providing live bacteria to help break down food and provide digestive enzymes. There are 22 known amino acids. This multi vitamin is fortified with 14 essential amino acids. And finally, this is a multi vitamin with the proper ratio of vitamin A, D, and E. Also, this mix has a calcium - phosphorus ratio of 1.6:1.
